

Price List Great Britain

Introduction

The JLR Charging rates are governed by the maximum charging speed.

JLR Charging differentiates the following charging speeds:

AC – alternating current (normal charging)

DC – direct current (fast charging)

HPC – high power charging (ultra-fast charging)

The maximum charging power capacity of each charging station can be found on the JLR Charging website and the app.

Please note that the transaction units for charging in public areas may vary due to regulatory requirements in the individual European countries. A transaction is differentiated in terms of kWh, time (min.), or by charging event. All prices are individually based on charge point operators. A variable tariff applies with regard to the individual charging process. The prices depend on respective charge point operators. For charging abroad (= e-roaming), you will always pay the local sales rate without any additional fees.

JLR Charging

The rates that apply to an individual charging event at the respective charging station can be found in the app and are subject to change. Please familiarise yourself with the applicable rates before commencing the charging event.

Tariff: Member

All prices include VAT

Charging Event Transaction

The invoicing of varying fees for charging is based on the appropriate tariff per minute (per commenced minute), per kWh or per charging event. The charging event starts if the vehicle is connected to the charging station and ends when it is disconnected. You can also recharge for free using the JLR Charging service at free charging stations.

All rates incl. VAT, subject to changes and errors.
